

This is the official walkthrough for Fates Collide Episode 3. If you wish to avoid spoilers, I suggest not looking at this document any further.

The walkthrough is in chronological order. The point of this PDF is to simply further help if someone needs additional info besides the Walkthrough mod this pdf comes with. This PDF is to purely show some other options you can take, and how many relationship points you need to trigger something ingame. Green colored text represents certain variables that the game tracks and uses at that specific spot. Blue colored text is related to unlocking images in image gallery.

Purely watching this WT without first playing the game can be quite confusing, so my suggestion is to first play the game without any WT mods or this pdf file, and only use it to find some images or secrets you wish to discover but are unable to.

## Episode 1

Expected something different -> Alone time with you (Ep1\_AvisCreeper)

Share your worries:

If Ep1\_AvisCreeper:
