

a GROVE flowchart

This is a fan flowchart/completionists' guide for RegalBuster's NSFW RPG game GROVE.

Make sure to play it first before looking at the chart, since there are many visual and story spoilers!

How To

The easiest way to use the flowchart is through the embed above.

Alternatively, you can download it and open index.html after extracting all files into a new folder.

Mistakes

Mistakes and omissions are likely to happen, either now or in the future as further game updates arrive.

If you spot one, please point it out in the comments below (or message me, if you prefer, but a comment may be more helpful), so that I can update the chart.

Intentional Omissions

Linear parts of the game are abridged and optional events that don't have lasting impact won't appear in the flowchart (except to provide context for fan works).

I try to add all corruption and character relationship changes, so if one of those is missing, it's unintentional.

Fan Works

The flowchart lists non-canon fan works that can be placed somewhere in the GROVE timeline (or in a timeline that branches off of it), with permission of the respective creator(s).

These tend to be somewhat more explicit than this guide, so viewer discretion is advised when following links.

If you'd like to see yours included, please [message me on Discord](#).

Including a link to where it's published is enough, but feel free to tell me where you'd like to see it and I'll try to take that into account.

(Similarly, if you'd like to see yours removed, just contact me again. I'll take care of it as soon as possible.)

Even if your story doesn't branch off or intersect directly with an official timeline event, I'd still like to include it below the "chapter" during which it takes place. (English-language isn't a requirement either. I just need to understand where to put it.)

Thematic Exclusions

Works with certain themes won't appear on the flowchart (and if I mistakenly add one, please tell me asap so I can remove them!). These include underage characters (or characters that appear as such), gore and scat, anything against Itch's rules, anything against applicable law and anything that should be listed here that I haven't thought of yet.

I'll privately let you know the reason if you messaged me and I decline to add something.
